

# EDGELESS

## Product Release

### Earthquake's EDGELESS In-Wall, In-Ceiling & Center Speakers *"A Seamless Blend Of High-End Audio & Interior Design"*

The **EDGELESS** Series of In-Wall & In-Ceiling Speakers is one of Earthquake Sound's most valued speaker lines. Designed with aesthetics (WAF-wife approval factor) and sound quality in mind, these speakers seamlessly blend into their surrounding as they provide a lifetime of durability and high-end performance.

Designed like no other, the new **EDGELESS** series is a prime example of Earthquake's continuing pursuit of audio excellence: "the goal is to seamlessly blend into any interior decor and to reproduce the sound of a concert hall or the sound of a movie sound track in any room with these speakers; with seamless super low profile, these speakers blends perfectly with any decor".

The **EDGELESS** speakers deliver deep, natural response from the design of their advanced cone and surround. Superb sonic accuracy is guaranteed by the utilization of stiff kevlar in the woofer and silk in the tweeters. Additionally, you can customize the sound of the speakers with +/- 3dB adjustment switches that optimize the sound to the acoustics of the room and end user's own personal preference.

#### **Main Features:**

- Frameless design for reduced visibility / seamless blend (less than 4mm grille protrusion)
- 1" (25mm) silk dome NEO swiveling tweeters
- Low mass stiff kevlar cone bodies for a very smooth & accurate output with attention to details.
- ± 3dB bass and treble controls
- Elaborate crossover networks with highest quality capacitors and inductors.
- 12dB/Octave crossover with polyswitch protection.
- Easy Turn-N-Lock™ installation mechanism for safe, time efficient and professional installation.
- Gold plated, spring loaded terminals
- Magnetically attached, paintable grilles

#### **Five (5) models to choose from:**

- EWS-600 (in-wall 6.5")
- EWS-800 (in-wall 8")
- ECS-6.5 (in-ceiling 6.5")
- ECS-8.0 (in-ceiling 8")
- EWS-530C (center / 3-way)
