

Hum Kleaner

Product Release

Two Channel Converter

The new Hum Kleaner is designed to solve the hum issue often found in audio installations; the Hum Kleaner provides two channels of unbalanced-to-balanced level conversion and two channels of balanced-to-unbalanced level conversions in a resilient, compact, and portable unit.

The Hum Kleaner can be a valuable tool in application areas such as home or professional recording studios, live sound, PA, permanent installs, DJ, AV, consumer HiFi, podcasting and broadcasting. It can also be used with mixers, audio processors, laptop computers, computer sound cards, CD/DVD players, video gaming machines, MP3 player/recorders, powered monitors and digital audio workstations.

Hum Kleaner | **MSRP**
\$149.00/Piece
